Vitamins to VEGA!

28th. October, 2024

VITAMIN I

01

The overall vitamin market was flat last week. Among them, the turnover of vitamin E was well, and the market price rose; Vitamin A stabilized, export turnover increased significantly; Vitamin B6 supply is tight, mainstream factories suspend quotation and sign order, the market mainly relies on consumption inventory operation; In addition, factory quotes remained firm due to rising raw material prices of niacinamide; Folic acid and biotin prices remained low.

AMINO ACID I Threonine

02

According to market news, on October 25th, the latest quotation of XMXYG Biochemical threonine: due to the growth of export demand, the supply of threonine is tight, and the quotation is USD1605/MT, According to the latest news of Meihua Group, the price of threonine including tax is USD1595/MT, mainly for long-term stable customers. The price was at a high level, and the users were mainly wait-and-see, and the market signed the single phase was less, and the factory was concerned about the order and delivery progress in the later stage.

API I

03

Last week, the overall veterinary drug raw material market was running strongly, the price of lots of varieties was raised after API exhibition, and the market inquiry was positive and the attention was high. Doxycycline factory still stopped reporting, trade channel price at USD43-43.6/KG, available stock is not much; Florfenicol, Tylosin/Tilmicosin, oxytetracycline hydrochloride, Lincomycin hydrochloride delivery is tight, factory price increased; Colistin sulfate factory price increased; Neomycin sulfate, amoxicillin, recent prices remain high.

FOOD ADDITIVE I

04

Last week, in the sweetener series of the food additives plate, the domestic factory quotation of sucralose was stable to USD26.2-26.5/KG, may have increase in short term. The price of aspartame remained stable and shipments were normal. The price of Acesulhoney is stable in the range of USD5-5.25/KG. In terms of nutritional fortifier products, creatine monohydrate is driven by the market situation, and the current transaction price in the domestic market is stable at about USD4.25-4.5/KG, and the delivery date is scheduled to mid to late November. L-carnitine series product price to maintain stable operation. The prices of preservative products, sodium benzoate, benzoic acid, potassium sorbate and sorbate have remained stable, and the delivery situation of various manufacturers is normal.
