Vitamins to VEGA!

20th. December. 2024

VITAMIN I Vitamin K3, Vitamin E **01**

According to market news feedback, vitamin K3 mainstream manufacturers all stop quotation and signing, in addition, it is reported that most of the factory have the plan of maintenance during Spring Festival.

According to a European media report, DSM Firmenich has announced that its joint venture with China Nent, Yimant, will be closed for temporary maintenance in January-February 2025, and again in June 2025, each closure is expected to last about 2 weeks.

AMINO ACID I Valine **02**

Recently, the latest offer of Dacheng valine: from now on USD2030/MT, limited supply regular customers. Trade market quotes followed the rise, not many transactions. At present, the domestic market supply is reduced, the terminal demand is increased under the market price increase, the factory delivery progress is slightly slow, the market as a whole is generally signed, pay attention to the progress of enterprise delivery, valine price is expected to be stable and slightly increased.

API I **03**

Oxytetracycline hydrochloride, the recent mainstream factory overall delivery continues to be tight, resulting in the recent market price is strong, the current market price is USD10.82-11.45/KG, is expected to remain strong in the short term, the follow-up needs to continue to pay attention to raw material delivery, factory production progress and market demand changes.

FOOD ADDITIVE I **04**

On December 19th, dairy giant Frieslandcampina announced plans to merge with Belgian dairy cooperative Milcobel, saying the merger would create a "leading dairy cooperative and dairy company." The combined organization will operate in 30 countries, employ nearly 22,000 people worldwide, process about 10 billion kilograms of milk, and have an estimated annual revenue of more than 14 billion euros. The revenue scale is expected to surpass Arla Foods and jump to around sixth place in the world.
