VITAMIN I Vitamin B6

01

On February 18, some vitamin B6 manufacturers stopped reporting and signing. Prior to this, first-tier brands quoted USD24.6-25.8/KG, and second-tier brands quoted around USD23.4/KG. The low-priced inventory in the market was gradually consumed, and the transaction price was strong. We will pay attention to the factory quotations in the future.

AMINO ACID I Valine

02

Valine: Domestic manufacturers' quotations are stable, and actual transaction prices are weak. Terminal demand is recovering slowly, users are not replenishing stocks at present, and the market transaction atmosphere is light. It is expected that the price of valine will be slightly weak. Pay attention to the progress of the valine anti-dumping case.

API I

03

Recently, the technical transformation project of tylosin series products and derivatives of Qilu Pharmaceutical (Inner Mongolia) Co., Ltd. was announced on the relevant website. The total investment of this project is 4.6585 million yuan, of which 1.64 million yuan is environmental protection investment, all of which is self-owned funds. The construction time of the project is 6 months. After completion, the production capacity of tylosin will be expanded by 2,000t/a, and the production capacity of the whole plant will be increased to 4,000t/a; the production capacity of tilmicosin will be set at 300t/a, and the production capacity of tilmicosin phosphate will be set at 1,200t/a.

FOOD ADDITIVE I Aspartame

04

Recently, the food additive aspartame, the export market transaction price is about USD9-9.3/KG, is expected to continue to maintain stability in the future.
