VITAMIN I

01

Last week, the vitamin market ran smoothly. During the VIV Asia in Thailand, factories and customers were busy with exhibitions and on-site communications. Influenced by BASF VE will resume production in a month and a half early, Chinese market traders are actively selling VE, and some companies are selling at low prices, but Chinese manufacturers are still quote high price, overseas markets have no significant changes. The customer is in a wait-and-see state; In addition, the market of B1, B6, D3, folic acid is strong, and the market of VA VC is weak.

AMINO ACID I

02

Last week, the lysine market was stable, 98% Lysine price market was weak, terminal customers were not active in signing orders, but the price was basically near the bottom. 70% lysine sulphate market was tight, factory orders and the market price increased. The quotation of Threonine factory increases or stops signing, the market heat increases, the inquiry is positive, the domestic signing is increased, the export price is between USD1200-1220/MT. The price of methionine is raised, the price is at a high level, the user is cautious to sign the order, the domestic trade market is active, the methionine market is expected to be strong in the short term.

API I

03

Last week, the overall veterinary drug raw material market ran smoothly, and some product markets were active. Tylosin, Tilmicosin supply is tight, and the inquiry and purchase is active; For Amoxicillin, the factory released the news of production reduction, the price is strong; Ivermectin, Enrofloxacin, Ciprofloxacin, oxytetracycline, etc., recent delivery is tight, the transaction has improved. Doxycycline, florfenicol maintain stable operation, pay attention to factory production and market demand changes.

FOOD ADDITIVE I

04

Last week, in the sweetener series of the food additives, the mainstream manufacturers of sucralose in the domestic market stopped quotation, and the future price continued to rise. Acesulfamil, aspartame prices remain stable, shipments are normal. In terms of nutritional fortifier products, creatine monohydrate is affected by the market situation, and the transaction price in the current domestic market is reduced, and the delivery schedule is scheduled to the end of March. L-carnitine series product price rise.
