VITAMIN I Vitamin B1, Vitamin E **01**

This month, the supply of vitamin B1 market continues to be tight, but the price is relatively stable, and the factory strictly limited the signing of orders. The market low price inventory continues to clear, customers to buy and use the main. The current market price of vitamin B1 nitric acid is about USD30/KG, vitamin B1 hydrochloric acid is about USD35/KG.

In the past week, the overall vitamin E market has been weakly, and the market transaction price has declined. However, the upstream factory quotation is very strong, and the price requirements are high, with some of the channel inventory out, from March 20, the domestic and export volume increased significantly, before some of the lower market quotes of the channel business have been notified to recover or to wait and see, the market has rebounded trend.

AMINO ACID I Threonine **02**

According to market news, the mainstream manufacturers of threonine have suspended their offers. Manufacturers of threonine exports slightly improved, the export price of about USD1200-1240/MT, according to customs data, January exports threonine 57,000 tons, February exports 52,000 tons, January-February cumulative exports of 110,000 tons, a year-on-year decrease of 5.9%.

API I Glutathione **03**

The State Food and Drug Administration recently issued a notice to suspend the import of five raw materials including glutathione from the Japanese company KYOWA HAKKO BIO CO.,LTD. The announcement shows that in the recent organization of Japan KYOWA HAKKO BIO CO.,LTD. During the on-site inspection conducted by the Hofu plant, it was found that glutathione, acetylcysteine, tryptophan, phenylalanine and L-valine produced by the plant were not organized and produced according to the approved information, and there were cases of outsourcing of raw materials for labeling and packaging or outsourcing of crude products for refining. It does not meet the relevant requirements of China's "Drug Production Quality Management Practice (revised in 2010)" and drug related review and approval.

FOOD ADDITIVE I Calcium propionate **04**

Recently, affected by the supply of propionic acid, the price of calcium propionate increased by about USD18.5-24.6/MT, and the subsequent price is bullish.
